

Cisco TelePresence MX700 & MX800

Cisco TelePresence MX700 and MX800 represent the performance line within Cisco's portfolio of integrated video collaboration room systems. They combine beautiful design and powerful functionality into an all-in-one solution for medium-to-large meeting rooms. These multipurpose systems will transform your meeting room into a video collaboration hub - whether for connecting teams across the globe or for local meetings. The MX700 and MX800 feature dual LED monitors for a people-only or people-and-content experience. The MX800 is also available with a single LED monitor for a peopled-focused solution.

The MX700 and MX800 systems come standard with a built-in amplifier and speaker system for the ultimate high fidelity sound. You can choose from a powerful single camera or an intelligent dual-camera speaker-tracking solution; both cameras deliver the best possible video imaging with up to1080p60 resolution. Premium resolution and dual display are also standard features on the MX700 and MX800. The intuitive Cisco TelePresence Touch 10 provides an ever so easy-to-use interface for both MX700 and MX800 systems.

Industry standards compliance lets the MX700 and MX800 support calls with any third party, standards-based system. Support for H.264 SVC also means the MX700 and MX800 can interoperate with software-based video conferencing solutions. And, as the industry's only H.265-ready systems, the MX700 and MX800 lay the foundation for future bandwidth efficiencies made possible by the new standard.

 Feature Summary

Feature Summary	
Design features	 One of the most powerful and feature-rich video systems available with the ultimate in video and audio quality The next generation HD video collaboration codec The next generation HD PTZ camera Everything you need in one unit (Screens, speakers, codec, camera, User Interface, Microphones, mounting) Wallmount or Floorstand (2 Floorstand options included: Freestand and wall secured floorstand) Industry first built-in speaker tracking system as option
Application features	 Supports Cisco Intelligent Proximity for content sharing to mobile devices and wireless sharing from Macs and PCs Supports Switched Conferencing (SVC) for enhanced layouts and enabling video on both screens of dual screen endpoints 1080p30 HD embedded Cisco TelePresence MultiSite with individual transcoding Collaborate with four simultaneous video inputs HD collaboration with 1080p60 main and 1080p30 content One button to push (OBTP) to start a meeting Ideal for team-based collaboration, boardrooms, meeting rooms and video centric rooms Dual presentation outside of a call (increase usage of system outside of a call - use the MX700 dual screens to compare 2 presentations/documents)
Performance features	 Optimal definition up to 1080p60 H.323/SIP up to 10 Mbps point-to-point Up to 10 Mbps total MultiSite bandwidth Ability to connect up to four HD sources and 8 microphones directly to the codec Full duplex audio with high-quality stereo sound Full application programming interface (APIs) Ability to take advantage of Cisco TelePresence Total Solution Management, transcoded HD MultiSite, recording and streaming, Ad-hoc Conferencing, and firewall traversal Cisco TelePresence ClearPath packet loss protection technology for optimal experience Cisco Unified Communications Manager native support (requires Cisco Unified Communications Manager version 8.6 or higher)
